**ALLOY USA ANNOUNCES NEW D44 SUPER X-JOINTS
FOR '07-'15 JEEP® WRANGLER**

Direct, Heavy Duty Replacement for OE U-Joints Stand Up to the Stresses of Off-Roading

Suwanee, Ga. (March 2015) – [Alloy USA®](#), a manufacturer of performance drivetrain products, today announced the release of its new D44 Super X-Joints for 2007-2015 Jeep® Wrangler (JK).

Available for Wrangler Rubicon and Rubicon Unlimited models equipped with Super Dana 44 axles, the heavy-duty X-Joints are a direct replacement for the factory U-joints. The X-Joints are manufactured from 8620 case hardened alloy steel and incorporate a number of design features to ensure the joints stand up to the stresses of off-roading.

Each of the X-Joint’s forged bearing caps feature an individual grease Zerk fitting for quick and complete lubrication. In addition, triple ridge seals help keep out dirt and contaminants to maximize joint life. Each Alloy USA X-Joint comes complete with four 360-degree retaining clips, four 180-degree retaining clips and four grease Zerk fittings.

“The great thing about these X-Joints is that they can withstand so much more than a standard U-joint ever could, so Jeep owners never have to worry about being stuck on the trail with a broken U-joint,” said Patrick Bennett, Product Development Manager at Omix-ADA.

Rugged Ridge D44 Super-X Joints are backed by Rugged Ridge’s 5-year limited warranty and will be available spring of 2015 online and through select Jeep and off-road parts/accessories retailers nationwide with an MSRP of **\$66.99**.
