RUGGED RIDGE ANNOUNCES NEW RECOVERY TOOL RACK FOR VARIOUS JEEP APPLICATIONS

Versatile & Accessible Storage Mounts to Rear-Mounted Spare Tire

Suwanee, Ga. (March 6, 2018) – [Rugged Ridge](#)[®], a leading manufacturer of high-quality Jeep[®], truck and off-road parts and accessories, today announced the release of its new Recovery Tool Rack for various Jeep applications.

The Rugged Ridge Recovery Tool Rack is engineered for the Jeep owner who wants to equip their vehicle for off-roading or any outdoor adventure. The design focuses on practical and convenient storage of tools while not sacrificing interior space.

The Recovery Tool Rack is stamped from durable steel plating and is finished with a resilient black powder coat, protecting the body of the rack from rust and corrosion while giving it an attractive appearance. The rack is fitted with three individual slots in which a variety of tools can be mounted for transport, with the tool handle secured via the included retention straps for a rattle-free ride.

The Rugged Ridge Recovery Tool Rack utilizes a built-in plate that attaches directly behind the rear-mounted spare tire. With a universal mounting bolt pattern, the rack is able to mount to any Jeep wheel bolt circles, making it compatible with any Jeep with a spare tire carrier, regardless of year.

Rugged Ridge's new Recovery Tool Rack mounts off-road implements outside the cab for easy access.
