RUGGED RIDGE EXPANDS LINE OF DRAKON ALLOY WHEELS WITH NEW SIZE FOR 2007-2015 JEEP® WRANGLER

Popular Wheel Design for Jeep JK Owners Now Offered in 18 x 9-Inch Size

Suwanee, Ga. (December 2014) – Following the success of its 17 and 20-inch Drakon Alloy Wheels, [Rugged Ridge](http://RuggedRidge.com)® today announced the availability of an all-new 18 x 9-inch size, allowing 2007-2015 Jeep® Wrangler owners more options to customize their Jeep.

Much like the 17 and 20-inch versions, the wheels are constructed from cast aluminum alloy and are available in two stunning finishes: satin black and gun metal.

Designed to appeal to even the most hardcore Jeep enthusiasts, the DOT-approved Drakon Alloy Wheels are engineered for an exact fit with 4.53-inch backspacing and a 2200-pound load rating on the Jeep's 5-on-5-inch bolt pattern. The hub-centric design also ensures precise centering upon installation to minimize stress on wheel studs and offer a perfectly balanced ride.

"We first created the Drakon wheel as a direct response to all of the Jeep owners who asked for a wheel different from any other on the market," said Alain Eboli, Engineering Manager at Omix-ADA. "Because of the popularity of our 17 and 20-inch wheels, we decided to offer Jeep owners another option for making their Jeep unique."

As with every wheel it offers, Rugged Ridge has been independently tested and certified the Drakon Alloy Wheels to exceed all SAEJ2530 standards, ensuring that it's strong enough to stand up to even the most rugged conditions.

Jeep owners now have even more options to make their Jeep unique with Rugged Ridge's Drakon Alloy Wheels, available in 17, 18 and 20-inch sizes as well as a variety of finishes.
